clear barrel made of polypropylene, with high contrast	12		5box	
13 Syringes 50cc Sbox graduations for precise volume measurement.		Syringes 50cc	5box	
	13			graduations for precise volume measurement.

			Needle gauge: 18G to 25G
	Syringes 30cc	5box	Typically has a clear barrel with graduations (markings) for
14			measuring the volume of fluid, typically in 1 ml increments.
			Needle gauge: 18G to 27G
	Syringes 20cc	5box	A graduated barrel with markings indicating volume, a nozzlo
15			for attaching a needle, and a plunger for fluid control.
			Needle gauge: 18G to 27G
	+		typically has a graduated scale on the barrel for accurate
			measurement of fluid volume, with intervals of 0.2, 0.5, or 1.0
16	Syringes 10cc	5box	ml.
			Needle gauge: 18G, 19G, 20G, 21G, 22G, and 23G
	Syringes 5cc	5box	consists of a barrel, a plunger, and a needle (often with a Lue
17			lock or slip fitting).
			Needle gauge: 21G, 22G, and 23G
	Syringes 3cc	5box	medical device with a capacity of 3 milliliters, used for
18			injecting or drawing fluids
			Needle gauge: 20G to 27G.
	Syringes 1cc (insulin syringe)	5bix	a medical device designed to hold and dispense 1 milliliter of
19			liquid.
			Needle gauge: 25G to 31G
20	R/L 1000ml	2	An isotonic solution containing electrolytes like sodium,
	ICE TOUGHI		potassium, calcium, chloride, and lactate.
21	N/S 1000ml	1	1000ml (1 liter) bag or bottle of Normal Saline (0.9% Sodium
			Chloride) intravenous (IV) solution.
22	D/S 10% 1000 ml	2	contains 10% dextrose by weight, and the total volume is 1000
			ml. purity of at least 99.0% (calculated on a dry basis) and a pH o
23	D/W 25% 100ml	1	around 8.3 for a 1% aqueous solution.
			Each milliliter contains 250mg of dextrose, delivering 3.4
24	D/S 25% 500ml	1	kcal/gram or 0.85 kcal/mL.
2.5	Sodium bi Carbonate 25ml	4	25 mL provides 25 mEq of sodium and 25 mEq of bicarbonate
25			The pH range is $7.5 - 9.5$.
26	KCL 20ml	4	
		2.1	consists of a spike, tubing, a drip chamber, a flow regulator,
27			and a connector. Specifications include the materials used,
	Infusion set	2 box	dimensions, and safety features, ensuring proper and safe fluid
			delivery
		20 1	Syringes: various sizes (e.g., 2mL, 5mL, 10mL). Cannulas:
28	Syringes, cannula different size	30 each	different gauges (e.g., 14G, 16G, 18G, 20G, 22G, 24G)
29	Electrolytes Solution	2	Medical Grade/Analytial Grade
